EDUCATION

Bachelor of Computer Science

King Abdulaziz University

2020-Present

GPA: 4.42 / 5

CERTIFICATIONS

May, 2023   McKinsey Forward Program

Jan, 2021   Linux Essentials course-Cisco

SKILLS

Problem-solving skills

Communication skills

adaptable and resilient mindsets

Working under pressure

Programming languages (SQL, Java, Python, HTML, Tailwind CSS)

LANGUAGES

Arabic

English

PROFILE

As a highly motivated student, I am seeking an internship in web development to gain hands-on experience and further develop my skills in back-end as well as front-end. I am excited to learn from experienced professionals in the field and contribute my analytical and practical computer skills to develop effective software solutions and to further the mission of the company.

WORK EXPERIENCE

My GitHub account contains projects I've worked on in a variety of fields, including databases, web development, computer graphics and others.
For instance:

- **School DataBase Management System:**

  A full database management system that manages and organizes student, teacher, and administrative data for educational institutions.

- **Java Lexical Analyzer:**

  I created a program that is able to break down java code into its individual components, known as lexemes and tokens.

- **courses website**

  I designed a responsive home page for a website that manages online courses using HTML and Tailwind as a framework for CSS.

- **Air Ticket Reservation System:**

  a complete program for the air ticket reservation system, Utilizing the idea of Object Oriented Programming.
